Thank you for visiting Cooper Medical Supplies. Our Ostomy products are available and in conjunction with the Ostomy Canada advertisement, ***you can receive 10% off Celebration® support belts*** by placing your order to wecare@coopermedical.ca and referencing the coupon **OSTC10%**. The Cooper Medical Supplies team has a strong belief in providing expert solutions and delivering the right product suited for our customer's needs.

You will receive a prompt email quoting cost and delivery of your ostomy belt.

What we need from you?

1. Measurements at the stoma level, in inches while laying down (see page 3 further instructions).
2. Specify 2 3/8" or 2 3/4" opening. (These sizes are standard inventory), other sizes are special order.
3. What appliance are you currently using...? Manufacture name and part name.
4. Our standard width of belt is 4", please state if you require special order.

Email to: wecare@coopermedical.ca quoting OSTC10%.

THE CELEBRATION® BELT FEATURES

The Celebration® Belt is made to work with the appliance you are now using.

The Celebration® Belt will fit either **right side or left side stomas** and is an excellent choice for ostomates with colostomy, ileostomy and urostomy procedures.

The Celebration Belt is made up of four parts.

1. The belt itself is made of a soft Tricot material backing and a Velfoam face material that are sewn to form a pocket to hold the “Stoma Hernia Plate”. The hole through which your pouch is pulled is surrounded by three “Button Holes” that fit the tabs of the “Stoma Shield”. The Open Weave Elastic is sewn to the belt body. All these materials are **LATEX FREE**.
2. The Stoma Hernia plate works to prevent leaking and give your hernia support. The Hernia plate is made of a soft plastic and manufactured to fit in the pocket of the belt body. It is made with the proper opening for the 2 3/8”, 2 3/4” and 3 1/2” Oval opening belts.
3. The Stoma Shield is die cut from a strong plastic material and folded to fit into the “Button Holes” over the opening of the belt. When in place it will allow proper flow into your pouch while preventing irritation or trauma to your stoma from seat belts or workplace or sports activities.
4. The adjustable pocket below the body of the belt holds your ostomy pouch so that your ostomy bag does not sway as you move and holds the weight of the ostomy pouch as it fills. This prevents any pulling effect on your wafer and prevents leaks.

The combination of all these four features makes the Celebration® Ostomy Support Belt completely unique and superior to any other belt.

We supply the **freedom** to live.
