

NEW Non-Valve Cambridge Masks Have Arrived!

The **NEW** Cambridge **Non-Valve** boasts exclusive long-lasting filter technology. Filtering out nearly 100% of all harmful air pollutants and viruses.

- Unique Lab tested British Military Filtration Technology filters almost 100% of pollution, gases, allergens, smog, and pollen
- Lightweight, breathable material
- Filters 99.6% of all viruses and 99.7% of bacteria
- Filters PM10, PM2.5, PM0.3
- Lasts up to 340 hours of active use (3 – 6 months)
- Ideal for air travel, grocery shopping, and crowded places
- Zero valve which results in limited ventilation so not advised for high-intensity activities such as running, cycling, or other sport.
- Adjustable ear loops with toggles for a secure snug fit
- Presented in eco-friendly packaging for storage

PRO VS NON-VALVE: THE DIFFERENCE

Cambridge Mask Co has come out with the latest and greatest in mask innovation with the same world-class filtration technology, but a new design and style that is compatible with 2021 travel mask requirements.

As you plan your summer travel 2022, you should be aware of updated international travel mask mandates that require specific types of face masks during transit. Though nearly all airlines and travel authorities require face masks during travel, some have now specified that passengers should only wear valve-less masks during transit.

NEW PRODUCT - HUMMM Wave - Black

These earplugs are durable and reusable so that you don't have to replace them night after night. Simply clean them between uses to help prevent the build-up of bacteria. They provide better sound quality at mid and high frequencies, without the muffling effect induced by foam-style plug. These transportable earplugs come with a small protective storage pouch.
